NEW TO THE UK MARKET

The ADR is a brand new product of its type to the market. Although there are many wired magnetic door holders, in the UK market there is not a **loop powered, addressable** door holder.

SAVES TIME

50%
faster to install*
*based on feedback from over 25 industry experts against standard door retainers

- Reduced wiring and commissioning of fewer devices
- Eliminates changeover between electrician and installer
- Wire the ADR straight from the nearest loop point
- Less time spent onsite, saving you time and money

SAVES MONEY

Conventional solution

4x I/O Unit + 24V PSU + Mains Isolator + Door Retainer

OR

Apollo's addressable solution

1x Loop powered which means no need for additional devices. Reducing installation cost and complexity.

SAVES LIVES

Fail safe by design. Door releases when loop voltage is lost or after 60 seconds of zero protocol communication, adhering to BS7273-4.
