

APOLLO FACT SHEET

OAAV RANGE

With louder sound output, advanced functionality and faster installation via connection to an XPERT base, Apollo's Intelligent Open-Area Audio Visual (OAAV) range provides next-gen innovation with classic compatibility. With a mix of both red and white sounders, red and white flash VIDs and sounder VIDs the range is fully compatible across XP, Discovery and Core Protocol.

APPLICATIONS

The Intelligent Open-area devices are truly versatile, making them a great fit for any application.

With seven volume levels, OAAV enables you to save on current consumption whilst retaining compliance by matching volume output to the room's requirement. A realistic bell tone, pre-set hospital mode and noise pollution timer functionality ensure OAAV meets varying install requirements and specifications, while sound-monitoring functionality safeguards system integrity.

This is all made even easier with local device configuration enabling the testing and changing of volume at the device location- saving time during maintenance and commission. Group and Global command functionality enables specialist C&E relevant to the application, enhancing safety with fast all-out evacuation, or facilitating phased evacuation and allowing for the bell tone to operate at different times within a building.

Apollo's OAAV range is ideally suited to applications such as:

APOLLO FACT SHEET

OAAV RANGE

SA5501-350APO
Open-Area Sounder VID
– White Body (White Flash)

SA5501-300APO
Open-Area Sounder
– White Body

SA5501-320APO
Open-Area VID
– White Body (White Flash)

SA5500-351APO
Open-Area Sounder VID
– Red Body (Red Flash)

SA5500-300APO
Open-Area Sounder
– Red Body

SA5501-321APO
Open-Area VID
– White Body (Red Flash)

THE OAAV RANGE

SA5500-300APO	Open-Area Sounder – Red Body
SA5500-350APO	Open-Area Sounder VID – Red Body (White Flash)
SA5500-351APO	Open-Area Sounder VID – Red Body (Red Flash)
SA5501-300APO	Open-Area Sounder – White Body
SA5501-320APO	Open-Area VID – White Body (White Flash)
SA5501-321APO	Open-Area VID – White Body (Red Flash)
SA5501-350APO	Open-Area Sounder VID – White Body (White Flash)
SA5501-351APO	Open-Area Sounder VID – White Body (Red Flash)

FUNCTIONALITY

Offers the following functionality when used on XP or Discovery protocol:

Tones	3	15 (pairs)
Volume levels	2	7
Setup & test mode	No	Yes
Noise pollution	No	Yes
Configurable VID flash rate	Yes	Yes
Realistic bell tone	No	Yes
'Hospital' mode tone	No	Yes
